

Sprint Plan #2

Context Project: Multimedia Services

Group: 5

User Story	Task	Task Assinged To	Estimated Effort per Task
As a user I should be able to listen to a preview of a song where the comment intensity is the highest.	After an url has been inserted in the webpage, extract the trackid and forward this to the java application. Afterward make sure the webpage get the starting point back to the webpage.	Jordy	High
	Get the information of the track out of the database using the trackid	Stefan, Daan	Medium
	Send the information to the comment intensity seeker	Stefan	Medium
	Determine the snippet based on the comment intensity	Tomas	Medium
	Send the starttime to the widget	Arthur	Low
	Finish the database with the comments	Daan	Medium
As a user I want to be able to add a song I like to my soundcloud collection.	Log in to Soundcloud	Arthur	Low
	Be able to like a song	Arthur	Very Low
As a user I want to be able to get a random song from the database.	Make a java class that calls a random song from the database.	Tomas, Stefan	Low
	Product Vision	ALL	Low
	Product Planning	ALL	Medium
