

Sprint Plan #7

Context Project: Multimedia Services

Group: 5

User Story	Task	Task Assigned To	Estimated Effort per Task
As a user I want to specify in how many parts a mix should be split and receive for each part a preview.	Add an option to the MixSplitter so it can determine the splits based on the amount of splits	Stefan	7
	Combine the MixSeeker and MixSplitter so a mix can be played by the Application	Stefan	3
	Refactor Application to accept the return of List<TimedSnippet> instead of int	Stefan	4
	Make the Mixsplitter play every snippet after each other when the MixSplitter button is pressed.	Arthur	4
As a user I want the system to recommend me different tracks that I would possible like based on the tracks I liked while using the application or the song I'm currently listening	Implementation of feature-based recommender.	Daan	5
	Make the UI element more slick by making the records a clickable picture.	Daan	4
	The recommender should be able to recommend on his own and together with other recommenders.	Arthur	12
As a user I want to be able to listen to music non-stop by pressing a Radio button.	Visual component that gives the user the opportunity to play music nonstop. Turning the feature on and off.	Tomas	2
	Make the widget reload new tracks when the radio feature is used.	Tomas	6
As a user I want to be able to go through advanced option on the webpage setting the application options such as, preview mode and recommender settings.	Add a visual component to the webapplication where the advanced feature controls can be put.	Tomas	3
	Make a route and send the advanced control values to the application.	Tomas	2
As a user I want the application to run fluently	Adjust select random song so that it takes less time to load the widget	Daan	2
	Every track should work with our application	Daan	
	1) Check if track is available in the database	Arthur	3
	2) If not, retrieve information from SoundCloud	Arthur	3
	3) Insert new information into database	Arthur	4
	Improved User Interface to make it more clear to the user.	Daan	5
	Small tweaks to the widget for autoplating selected tracks	Daan	2

	Update tooltip	Tomas	1
	Implement help button that displays the tooltip again	Tomas	3
	Make Profile and DatabaseConnector a singleton	Stefan	2
	Implement SIG feedback	Stefan, Daan	12
As a user I want the preview functionality to be optimal	Review preview (especially the contentfilter) based on other papers and info about natural language processing	Tomas	12
	Weekly adjustment of the Emergent Architecture Design	Responsable: Stefan	12
